Professional Summary

An astute tech-savvy with proficiency in application and website development boasting over 5 years of pragmatic expertise. Self-drive and hard work are some of the attributes that steer me to deliver on my goals and visions as expected of me hence developing my work ethic to become a reliable professional. I am also effective when it comes to team work as well as handling individually assigned projects since both provide a platform for learning, objectivity and growth. My main objective is to pursue a career in an organization where there is a good understanding of technology and a marketing background where my skills can be effectively utilized in line with achieving the set goals.
